

LOMA Society Charter

Be it known that:

LOMA was founded in 1924 to further research and education related to the management and operation of financial services companies.

In 1932, LOMA founded a program of study for professionals in the life insurance industry. Today LOMA — over 80 years of experience and 2.9 million exams delivered in seven languages in 80 countries — continues to develop education standards of excellence for professionals in the insurance and financial services industry.

LOMA confers Fellow, Associate and Professional designations upon those who complete prescribed programs of examinations.

LOMA duly recognizes the formation of Societies of designees for the purposes of promoting continuing professional development among designees, fostering recognition of LOMA designations, assisting others in earning designations, and encouraging professional, educational, and social relations among designees.

Since each LOMA Society abides under the guidance and protection of LOMA, be it known that the

LOMA Society of Nebraska

has been duly chartered as a professional society of LOMA Designees.

Done, on the 28th day of April, 2005
