

LOMA Society of Nebraska

CHARTER

Be it known that:

The Life Office Management Association is an association founded in 1924 to further research and education related to the management and operation of life insurance companies.

In 1932 the Life Office Management Association founded a program of study for the professionals in the life insurance industry. This program of study is administered by the educational division of the Life Office Management Association, the Life Management Institute.

The Life Management Institute duly recognized the formation of Societies of Fellows of the Life Management Institute for the purpose of promoting continuing professional development among FLMI's, fostering recognition of the FLMI designation, assisting others in earning the FLMI designation, and encouraging professional, educational and social relations among FLMI's.

Since each FLMI Society abides under the guidance and protection of the Life Management Institute, let it be known that the FLMI Society of Nebraska has been duly Chartered as a professional society of Fellows of the Life Management Institute,

Done on the 20th day of January, 1983

Lynn S Merritt
